Appl. No. 09/519,129 Amdt. dated May 6; 2004

Reply to Office action of October 28, 2003

## In the Claims:

Claims 1, 8 and 14 are amended herein. The remaining claims are not amended in this response.

1. (currently amended) A hologram-recording dry plate fabrication process comprising steps of:

providing a supply of plurality of <u>discrete</u> sheets of a sheet-cut form of hologram recording photosensitive film comprising a supporting film, a hologram recording photosensitive material and a separator, said supply of sheets being in a precut form and plural ones of said sheets being stored together in said pre-cut form;

iteratively feeding <u>discrete</u> ones of a substrate <u>one by one</u> from a supply having a plurality of substrates to a lamination section,

iteratively positioning ones of said sheet-cut form of hologram recording photosensitive film adjacent ones of said substrate,

releasing said separator from said fed ones of said sheetcut form of hologram-recording photosensitive film, and

laminating said ones of said sheet-cut form of hologramrecording photosensitive film from which said separator is released on one surface from a hologram recording photosensitive
